SKILLS

FRONT END: Javascript(ES6+), Angular 4+, TypeScript, RxJS, SASS, Cypress.io, Mapbox, Ionic, Atlassian Suite

BACK END/DEVOPS: Docker, REST APIs, MySQL, AWS, CD/CI Automation

EXPERIENCE

Full Stack Developer

DecisionLink, Inc: A value enablement platform.

January 2022 – Present, Atlanta, GA (Remote)

- Contributed to significant new features to a complex SaaS application using Angular 12 and collaborated with a 10-person off-shore development team.
- Performed code reviews and contributed to stricter code-quality guidelines and Angular best practices.
- Spearheaded and implemented upgrading from Angular 8 to Angular 12, an app with ~600 components.
- Created a translations cache reducing total API requests by 13% and improving page load performance by an average of .5 seconds.

Senior Front End Developer

Ratio.City

January 2020 – December 2021, Toronto (Remote)

- Developed application UI for four major features using Angular 11 and Material Design.
- Hired, onboarded, and managed junior front-end developer to first successful performance review.
- Led the development team on Angular architecture, performance, and testing with Cypress.
- Managed application state with a custom observable-based message bus state management system.
- Re-architected front-end app to improve application architecture, performance, UX, and maintainability.
- Led daily SCRUM stand-up meetings with a remote 14-person development team.
- Researched and implemented PDF conversion of a custom report builder feature using DocRaptor's API.

Freelance Front End Developer

Volum8 Creative, Inc

March 2020 – January 2021, Montgomery, NY (Remote)

- Developed a Webby award-nominated nutrition-coaching PWA using Angular 9, Ionic 5, Material Design, and RxJS.
- Refactored customer-facing charts using Highcharts, resulting in a ~150% load-time improvement.
- Implemented a complex custom chat and group messaging feature for ~5,000 users with GetStream.io's API.
- Revised the application to allow the upgrade from Angular 8 to 9 and from Ionic 4 to 5.

Full Stack Developer

Daakor.com

May 2019 – December 2019, Toronto

- Created, updated, and documented multiple API endpoints of a Slim PHP REST API.
- Built an admin dashboard using React to enable better clarity into business metrics.
- Integrated Sendgrid API to replace SMTP messaging and Shopify GraphQL API for e-commerce.
- Implemented RabbitMQ for asynchronous message queue processing, resulting in a 200% increase in message sending speed.
- Instituted a CI/CD pipeline from BitBucket to AWS, reducing deployment time to under 4 minutes.

Front End Developer

Beck.com

August 2010 – April 2013, New York, NY

- Committed changes to WordPress repo with Subversion, pushed changes to load-balanced AWS EC2 instances.
 - Implemented website design updates using PHP, HTML, CSS, and Javascript from Photoshop mockups.
-

SUMMARY

Full Stack Developer with 5 years of hands-on experience in Typescript, CSS, HTML, JavaScript, Angular, and Ionic. Proven ability to collaborate with designers, product managers, and back-end engineers to build scalable web applications supported by automated web testing frameworks.
